emperance as a Health Problem

The keynote of the new spirit in temperance teaching was sounded we other day by Dr George W Webster, President of the Illinois Board of Health, when he said:

"More may be accomplished by teaching the people the truth in regard to the fatal effects of alcohol upon mental and physical efficiency than by expatiating on the moral wickedness of drinking."

This is a doctrine which everybody interested in the genuine develop ment of temperance would do well to bear in mind. Long-haired orators who come around and grow eloquent over drunkards' graves and blighted homes and deserted wives may or may not do permanent good. If drinking is a sin, then it's a sin because it injures a man, and if a temperance advocate is to accomplish any permanent good he must show just how it injures a man. Life insurance tables show that a man of thirty stands a 25 per cent better chance to live to be seventy if he doesn't drink-and one demonstrated statistical fact like this outweighs all the eloquent generalities in "Ten Nights in a Bar-Room."-Raleigh (N C) Progressive Farmer and Ga-
